Project Title:

Construction Management System

Brief Description:

The Construction Management System is a web application designed to streamline and manage construction projects efficiently. It provides companies and users with tools to manage projects, track progress, handle company profiles, and maintain a materials cart for seamless operations. The system ensures smooth communication between companies and users, providing a centralized platform for project management.

Technology usage (Eg: NodeJS, ReactJS):

Frontend: ReactJS, Tailwind CSS

Backend: NodeJS, ExpressJS

Database: MongoDB
